The Heating and Ventilating Magazine

Vol. XXI No. 1

Contents for January, 1924

A Short, Practical Method of Designing Gravity Water Heating Systems *F. E. Giesecke* 41
With Six Illustrative Problems Frequently Uncountered in Practice, and Their Solutions.

New Data on the Weather in the United States *G. J. O'Connor* 47

Commercial Efficiency of Single and Graded Steam Pipe Coverings *H. J. Dana* 48
Results of Recent Tests on Magnesia, Air Cell, Asbestocel, Carocel, Nonpareil, Sponge Felt and Multiply Types.

When Steam-Heated Air is Drier Than Water-Heated Air 52

Fresh Air *E. Vernon Hill* 52

Aerology for Amateurs and Others *E. Vernon Hill* 53
X-Air Distribution.

Problems of Electric Drive for Ventilating Equipment *F. R. Still* 57
Noiselessness and Speed the Controlling Factors in Requiring Belt-Connected, Rather than Direct-Connected, Motors.

Ventilation of Garages in Building Basements *Nelson S. Thompson* 58

What Is Wrong with Central Vacuum Cleaning Systems *Edwin J. Skillman* 59

Back to First Principles *T. W. Reynolds* 61
Plain Answers to Questions on Present-Day Heating and Ventilating Practice.

How to Use the Psychrometric Chart *E. T. Murphy* 65

Engineering Progress Illustrated 66

American Society of Heating and Ventilating Engineers 71
Program for Annual Meeting.
Philadelphia Chapter Hears Talks on Smokeless Combustion.
Professor A. C. Willard Guest of St. Louis Chapter.
Semi-Dry Filters Discussed by Kansas City Chapter.
Motion Pictures of the Hudson River Vehicular Tunnel Shown at Meeting of Wisconsin Chapter.
New York Chapter's "Past President's" Night.
Massachusetts Chapter.

Institution of Heating and Ventilating Engineers 72
Research Bulletin No. 1.

Oil for House Heating as Seen by the American Oil Producers' Association 72

Research and Educational Plans of the Furnace Manufacturers 73
Determining the Sizes of Warm-Air Furnaces According to the Warm-Air Furnace Code.
A Practical Plan for Better Warm-Air Furnace Work.

The Weather for November, 1923 74
New York, Boston, Pittsburgh, Chicago and St. Louis.

Correspondence 76
Errors in Figuring Humidity Problems.
English Fan Design in Line with Latest American Practice.
A Conception of Heating as a Three-Fold Problem.

Heating Contractors to Study Seasonal Employment 77

Practical Demonstration of Heaters Using Buckwheat Coal 77

National Trade Extension Bureau 78
Another Suggested Window Display of Heating Equipment.
How Apprenticeship Affects You.

Success of Second Annual Power Show in New York 80

New Year Holds Good Promise *L. W. Alwyn-Schmidt* 81
Further Improvement Likely During Spring Season—Review of Past Year.

New Books 82
Heating and Piping Contractors National Association Engineering Standards.
Transactions of the American Society of Heating and Ventilating Engineers, Vol. 27, for 1921.

Standard Heating and Ventilating Data Sheets 84
No. 4-C—Temperatures in the United States.
No. 4-D—Temperatures in the United States (Continued).
No. 4-E—Temperatures in the United States (Continued)
No. 4-F—Temperatures in the United States (Concluded).

Engineers' Specification Index, Page 124.

Advertisers' Index, Page 130.

YEARLY SUBSCRIPTION $2.00 **SINGLE COPIES, 20 CENTS**

Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.
Executive and Editorial Offices 1123 Broadway, N. Y.
Entered as second-class matter at the Post-Office at Albany, New York, December 1, 1923, under the Act of March 3, 1879.
Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 2

Contents for February, 1924

Practical Notes on the Use of Pressure Regulators and Pressure-Reducing Valves *T. H. Ireland* 49
Common Errors to Avoid in the Application of These Devices, Based Upon a Long Experience in This Field.

Is Our Climate Changing? *G. J. O'Connor* 53

Air Leakage Through the Openings in Windows *F. C. Houghten and C. C. Schrader* 54
Important Results of New Tests at A. S. H. & V. E. Research Laboratory, Confirming Effectiveness of Weatherstripping and Furnishing New Data on Air Infiltration Through Walls.

Remedying Defects in a Hot Water Circulating System *C. Rye* 58

A Short, Practical Method of Designing Gravity Water Heating Systems II *F. E. Giesecke* 59
With Six Illustrative Problems Frequently Encountered in Practice, and Their Solutions.

Steam Conduit System for the Dupont Horticultural Buildings *F. Lynn Cason* 61

The Economical Utilization of Heat from Central Station Plants *N. W. Calvert and J. E. Seiter* 64
Points on the Design of Building Layouts to Secure a Maximum of Service with a Minimum of Expense.

Back to First Principles II *T. W. Reynolds* 68
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

American Society of Heating and Ventilating Engineers 71
Future of Research Laboratory and Proposed Code on Heating and Ventilation Take First Place at Thirtieth Annual Meeting of A. S. H. & V. E.
Western New York Chapter Hears Address on Underground Steam Main Construction.
Kansas City Chapter Makes Strong Bid for the Next Summer Meeting of the A. S. H. & V. E.
St. Louis Chapter Election.
Air Filters Discussed by Illinois Chapter.

Who's Who in Heating and Ventilation 75
1. S. Homer Woodbridge.

Wisconsin's Code for Heating and Ventilating 84
Principal Requirements of Most Recent Law to Be Enacted on This Subject, Including Provisions for Recirculation of Air.

New Project to Identify Piping Systems by Colors 87

The Weather for December, 1923 88
New York, Boston, Pittsburgh, Chicago and St. Louis.

Correspondence 90
Preventing Water-Hammer in Radiators.

How the Urbana Educational Research Building May be Used 90

Burning 95% Air in a Gas Burner 91

Legal Decisions 92
Steam Heating Utility Allowed 8% Return; Flat Rates Allowed in Special Circumstances, Though Meter Rates Preferred.
Ordinance Requiring Heating Contractors and Engineers to Be Licensed and File Bonds Held Invalid.

A Summary of Our Present Knowledge of Air Temperatures, Air Motion and Humidity 94

Types of Fuel-Oil Burners for Household Use 95
VIII—The A. B. C. Oil Burner.

Improvement in Sight, But Not Yet Here *L. W. Alwyn-Schmidt* 98
Cautions Against Increase in Nation's Industrial Equipment and Multiplication of Industrial Enterprises.

Precautions to Be Taken to Prevent Carbon Monoxide Poisoning From Gas Stoves 99

Standard Heating and Ventilating Data Sheets 104
No. 14—Radiator Ratings, 1-Col. Steam, Exposed.
No. 14-A—Radiator Ratings, 2-Col. Steam, Exposed.
No. 14-B—Radiator Ratings, 3-Col. Steam, Exposed.
No. 14-C—Radiator Ratings, 4-Col. Steam, Exposed.

Engineers' Specification Index, Page 144.
Advertisers' Index, Page 150.

YEARLY SUBSCRIPTION $2.00 **SINGLE COPIES, 20 CENTS**

Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.

Executive and Editorial Offices 1123 Broadway, N. Y.

Entered as second-class matter at the Post-Office at Albany, New York.
December 1, 1923, under the Act of March 3, 1879.
Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 3

Contents for March, 1924

Looking Towards the Future in Heating Practice.....*Samuel R. Lewis* 39
Some Unusual Angles of Vision, Based Upon 1923 Progress and 1924 Possibilities of Our Instruments of Service.

Studies in House Humidifying.....*P. H. Bryce* 43
Pioneer Work of a Canadian Provincial Health Officer in Meeting the Problem of Humidity in the Home.

Aerology for Amateurs and Others.....*E. Vernon Hill* 45
XI—Measuring Air Velocities.

"Effective Temperature" or "Equal Comfort" Lines
F. C. Houghten, C. P. Yaglaglou and R. R. Sayers 49
A Review of the Data Obtained to Date Which Shows How Far the Basis for Comfortable Air Conditions Depends Upon Both Dry-Bulb and Wet-Bulb Temperatures and Air Movement.
1—"Effective Temperatures" for Still Air Conditions.

The Trend in the Unit Heater Field.....*Arthur H. Greene* 55
With Special Reference to the Use of Copper and Brass Radiators as a Means of Reducing Size and Weight and Increasing Efficiency.

Downward-Diffusion Air Conditioning System for a Large Theatre..... 57
How Grauman's Metropolitan Theatre, Los Angeles, Cal., Is Heated, Humidified and Ventilated in Winter and Cooled in Summer.

Back to First Principles.....*T. W. Reynolds* 59
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

A Symposium on Hot Water Systems for Heating Industrial Plants..... 63

Engineering Progress Illustrated..... 64

Practical Considerations in the Operation of Central Heating Plants..... 66

New Fuel-Oil Rules for New York City..... 67
Amendments Adopted by the Board of Standards and Appeals, Dealing with the Construction and Installation of Oil-Burning Equipment and Storage and Use of Fuel-Oil.

University of Illinois Short Course for Steamfitters and Plumbers..... 71

New York's Coal Economy Show..... 71

Practical Use of the Earth as a Source of Heat..... 71

The Weather for January, 1924..... 72

American Society of Heating and Ventilating Engineers..... 74
Summer Meeting to be Held in Kansas City.
The New Secretary of the A. S. H. and V. E.
Endowment Plans for the A. S. H. and V. E. Research Laboratory.
Further Details of the New Hudson River Vehicular Tunnel Given to New York Chapter.
Illinois Chapter Holds "Stunt" Night.
Kansas City Chapter Hears Talk on Synthetic Air Chart as Applied to Society's Proposed New Heating and Ventilating Code.
New Officers of Western New York Chapter.
St. Louis Chapter.

1924 to be Another $5,000,000,000 Building Year..... 75

Speed Limits for Fans Used in Heating and Ventilating Work..... 76
New York, Boston, Pittsburgh, Chicago and St. Louis.

Bacteria and Dust Control in Food Product Plants.....*B. H. Thurman* 77

Outlook Favorable.....*L. W. Alwyn-Schmidt* 79
General Improvement Expected in Second Half of March.—Need for Well-Measured Supply of Quality Merchandise.

Standard Heating and Ventilating Data Sheets..... 82
No. 14-D—Radiator Ratings—1-Col. Steam, Enclosed, Front and Top Registers.
No. 14-E—Radiator Ratings—2-Col. Steam, Enclosed, Front and Top Registers.
No. 14-F—Radiator Ratings—3-Col. Steam, Enclosed, Front and Top Registers.
No. 14-G—Radiator Ratings—4-Col. Steam, Enclosed, Front and Top Registers.

Engineers' Specification Index, Page 120

Advertisers' Index, Page 126

YEARLY SUBSCRIPTION $2.00 **SINGLE COPIES, 20 CENTS**

Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.

Executive and Editorial Offices 1123 Broadway, N. Y.

Entered as second-class matter at the Post-Office at Albany, New York, December 1, 1923, under the Act of March 3, 1879.

Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 4

Contents for April, 1924

The Future of Heating as Seen by the Gas Men.....*J. E. Bullard* 41
Significance of the Changing Domestic Fuel Situation and its Eventual Evolution Through the Use of Liquid and Gaseous Fuels.

The Argument for the Slow-Speed Direct-Connected D. C. Motor for Ventilating Fan Drive.....*J. L. McK. Yardley* 43

A Short, Practical Method of Designing Gravity Water Heating Systems
F. E. Giesecke 47
III—Design of System II.

Back to First Principles.....*T. W. Reynolds* 52
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

Ventilation Requirements in Areas Occupied by Motor Vehicles..... 54

Pipe Conduit Design wth Unique Features.....*J. P. Greenwood* 55

Operating Characteristics of Radiator Traps..... 57
What the Heating Industry Should Expect of These Devices in the Way of Performance—A Symposium Based Upon the Recent Tests Conducted by the National Association of Building Owners and Managers.

Legal Decisions..... 60
Evidence that Pipes Sagged Five Years After Installation of Heating Plant Immaterial.
Effect of Clause "Free from Mechanic's Liens" in Installation Contracts.
Ascertainment of Liability Under Contractor's Bond.
Valid Consideration for Lessor's Promise to Pay for Repairs on Heating Plant

The Testing of Cartridge Copper Radiators..... 61

Radio Broadcast Talk on Heating Problems.....*E. F. Glore* 62

Correspondence..... 63
Points on Heating Boiler Operation.
Water Troubles on Two Vacuum Heating Systems.

Definitions of Common Terms Used in Heating and Ventilating Practice..... 66

Who's Who in Heating and Ventilation..... 67
II—William J. Baldwin.

Engineering Progress Illustrated..... 68

Massachusetts Commission Proposed to Study Air Conditions in Buildings..... 71

New Heating Code for Roanoke, Va...... 71

Proposed Industrial Code for Laundries..... 71

The Weather for February, 1924..... 72
New York, Boston, Pittsburgh, Chicago and St. Louis.

American Society of Heating and Ventilating Engineers..... 74
Western New York Chapter Discusses Gas as a Fuel.
Secretary C. W. Obert's Record with the A. S. H. & V. E.
New Members of the A. S. H. & V. E. Committee on Research.
A. S. H. & V. E. Nominating Committee Appointed.
New York Chapter Discusses Business and Professional Ethics.
Illinois Chapter Discusses Proposed National Heating and Ventilating Code.
New Officers of Cleveland Chapter.
Kansas City Chapter Preparing for Society's Summer Meeting.

Annual Meeting of British Heating Engineers..... 76

Death of Frank K. Chew..... 77

Condition Is Normal.....*L. W. Alwyn-Schmidt* 82
Market Retains Healthy Aspect—Industry Optimistic.

Standard Heating, Heating and Ventilating Data Sheets..... 86
No. 14-H—Radiator Ratings—1-Col. Steam, Enclosed, Full-Front Registers.
No. 14-I—Radiator Ratings—2-Col. Steam, Enclosed, Full-Front Registers.
No. 14-J—Radiator Ratings—3-Col. Steam, Enclosed, Full-Front Registers.
No. 14-K—Radiator Ratings—4-Col. Steam, Enclosed, Full-Front Registers.

Engineers' Specification Index, Page 128.
Advertisers' Index, Page 134.

YEARLY SUBSCRIPTION $2.00 SINGLE COPIES, 20 CENTS
Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.
Executive and Editorial Offices 1123 Broadway, N. Y.
Entered as second-class matter at the Post-Office at Albany, New York, December 1, 1923, under the Act of March 3, 1879.
Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 5

Contents for May, 1924

Adapting the Oil Burner to Existing Heating Plants.....*Homer R. Linn* 41
Some Plain Words on Common Installation and Operating Faults, with Suggestions for Overcoming these Difficulties.

Practical Notes on the Cooling of Air.....*H. J. Macintire* 44
Data Covering a Typical Mechanical Refrigeration Installation in a Chocolate-Dipping Factory.

A Scheme for Heating Buildings With Refrigerating Plants..... 47

Safe Practices in Acetylene and Oxygen Welding..... 48

Aerology for Amateurs and Others.....*E. Vernon Hill* 49
XII—Measuring Air Flow.

Efficiency of the House-Heating Oil-Fired Boiler.....*James L. Breese, Jr.* 51
Difficulties Which Have to be Met and Overcome in this New Field, Based Upon the Experiences of an Oil-Burning Boiler Manufacturer.

Use of a Signal System for Improving Central Heating Plant Operation
H. A. Woodworth 54

A Quick and Useful Horizontal Tank Chart.....*W. F. Schaphorst* 56

Oil Burner Manufacturers Hold First Annual Convention..... 59
Makers of Both Industrial and Domestic Appliances Meet to Study the Status of this Rapidly-Growing Industry and to Open the Way for Its Further Progress.

Temperature and Safety Controls for House-Heating Oil Burners....*H. W. Sweatt* 59

New Data on Comparative Building Costs..... 63

National Warm-Air Heating and Ventilating Association Launches Its Educational Research Campaign..... 64

American Society of Heating and Ventilating Engineers..... 65
Program for Semi-Annual Meeting
New York Chapter Hears Talk on Manufacture of Copper and Brass Indirect Heaters.
Illinois Chapter Discusses Gravity Water Heating
Massachusetts Chapter
St. Louis Chapter Appoints Code Committee.
Western New York Chapter Entertains University of Kentucky Engineering Students.
Kansas City Chapter Discusses Research Laboratory Plans.
Society Officers at Meeting of Philadelphia Chapter.

Who's Who in Heating and Ventilation..... 67
III—Frederick R. Still.

Engineering Progress Illustrated..... 68

National District Heating Association..... 71
Program for Annual Meeting.

Heating and Piping Contractors' National Association..... 71
On to Atlantic City.
New Officers of New York City Association.

Correspondence..... 72
Favors Water Heating Systems for Industrial Plants.
Preventing Water Hammer in Radiators.
Effect on Pipe Sizes in Changing Heating System from Gravity to Vacuum.
The Sylphon Type of Air Valve.

Death of Elias D. Smith..... 73

The Weather for March, 1924..... 74
New York, Boston, Pittsburgh, Chicago and St. Louis.

Savings through Temperature Control in a Minnesota Building..... 79

Outlook Optimistic.....*L. W. Alwyn-Schmidt* 82
Market not Losing Ground—Policy of "Watchful Waiting" May Soon Come to an End.

Standard Heating and Ventilating Data Sheets..... 86
No. 14-L—Radiator Ratings—1-Col. Steam, Enclosed, Two Top Registers.
No. 14-M—Radiator Ratings—2-Col. Steam, Enclosed, Two Top Registers.
No. 14-N—Radiator Ratings—3-Col. Steam, Enclosed, Two Top Registers.
No. 14-O—Radiator Ratings—4-Col. Steam, Enclosed, Two Top Registers.

Engineers' Specification Index, Page 128.
Advertisers' Index, Page 134.

YEARLY SUBSCRIPTION $2.00 SINGLE COPIES, 20 CENTS

Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 6

Contents for June, 1924

Allotment of Space for the Mechanical Equipment of Buildings. *Nelson S. Thompson* 41
Provisions Which Should Be Made in the Initial Design of a Modern Building to Properly Accommodate the Necessary Apparatus.

Heating Semi-Exposed Portions of Buildings..... *John G. Garraway* 44

A Short, Practical Method of Designing Gravity Water Heating Systems *F. E. Giesecke* 45
IV—Design of System III-A.

The Fallacy of "Air Change" Factors in Figuring Heating Requirements *Alfred M. Lane* 51
Evolution of a Commonly-Used Method of Estimating Air Leakage, with Reasons for the Adoption of "Air Infiltration" as a Basis.

Our Artificial Winter Climate..... *Paul W. Goldsbury, M. D.* 53

Back to First Principles..... *T. W. Reynolds* 55
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

Heating and Piping Contractors' National Association..... 59
Proceedings of Thirty-fifth Annual Convention.

Bureau of Mines Analyzes High-Temperature Tests..... 66

New Regulations for the Installation of Blower and Exhaust Systems..... 63

Correspondence 65
Notes on House Humidifying Problems.
Operating Costs of Institutional Heating Plants.
The Early Days of Heating and Ventilation.

Warning on Garage Gases..... 66

Operating Characteristics of Radiator Traps II..... 67
A Symposium Based Upon Recent Tests Conducted by the National Association of Building Owners and Managers.
The Sterling Trap.
The Dunham Trap.

Engineering Progress Illustrated..... 68-69
Educational Research Residence of the National Warm-Air Heating and Ventilating Association.

Philadelphia Building Congress Evolves New Designations for Employers and Workers in the Building Industry..... 70

Legal Decisions..... 71
Increase in Heating Rates Cannot Be Based on Impudent Coal Contract.
Interpretation of Schedule of Rates.
Valuing Steam Heating Property for Rate Making.

The Weather for April, 1924..... 72
New York, Boston, Pittsburgh, Chicago and St. Louis.

Organization of the Williams Institute of Heat Research to Study Oil Burning Problems 74
I—The Measure of an Oil Burner.

List of Approved Oil Burners..... 74

Remarkable Steam Flow Curve for Central Station Heating Plant..... 76

New Books..... 76
Designing Heating and Ventilating Systems.
Marks' Engineers' Handbook.

Market of Changing Moods..... *L. W. Alwyn-Schmidt* 83
Business Suffers from Attack of Nerves—No Cause for Alarm in Present Situation.

Death of William J. Baldwin..... 84

Standard Heating and Ventilating Data Sheets..... 86
132-UU—Vapor Heating Systems—Hoffman Controlled Heat.
132-VV—Vapor Heating Systems—Hoffman Controlled Heat.
132-WW—Vapor Heating Systems—Hoffman Controlled Heat.
132-XX—Vapor Heating Systems—Hoffman Controlled Heat.

Engineers' Specification Index, Page 128.
Advertisers' Index, Page 134.

YEARLY SUBSCRIPTION $2.00 **SINGLE COPIES, 20 CENTS**
Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.
Executive and Editorial Offices 1123 Broadway, N. Y.
Entered as second-class matter at the Post-Office at Albany, New York, December 1, 1923, under the Act of March 3, 1879.
Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 7

Contents for July, 1924

Cold Storage for Furs and Fabrics.....*H. J. Macintire* 47
The Requirements to Be Met in Overcoming the Ravages of Moth Millers and Beetles, with Notes on Successful Practice in the Design of Cooling Apparatus for Cold-Storage Rooms.

Selecting Wall Stacks Scientifically for Gravity Warm-Air Heating Systems
V. S. Day 49

How to Figure the Resistance of Pipe Bends to the Flow of Steam..*Charles H. Day* 51
With Data on Four Assumed Conditions, Using Standard Ells, Long-Radius Ells, Minimum-Radius Bends and Bends with a Radius of Ten Pipe Diameters.

A Speedy and Accurate Method of Figuring Radiator Sizes.....*P. R. Babcock* 53

The "Fixed Orifice" Method of Temperature Control..... 55
Tests Showing the Practicability of this Arrangement as Used with Variable Pressures of Either Water or Steam.

American Society of Heating and Ventilating Engineers..... 59
Plans Formulated at Semi-Annual Meeting to Continue Research Laboratory as Strictly a Society Proposition—Final Action Deferred on Proposed Heating and Ventilation Code.
Using By-Products in Four Mill Heating and Humidifying, *E. K. Campbell.*
Performance of a Warm-Air Furnace with Anthracite and Bituminous Coal, *A. P. Kratz.*
Determining Dry-Return Proportions, *R. V. Frost.*
Air Leakage Around Window Openings, *C. C. Schrader.*
Ozone and Its Use in Ventilation, *Frank E. Hartman.*
Modern Trend in the Science of Ventilation, *Perry West.*

National District Heating Association..... 76
Optimism the Slogan of the Central Heating Men as Reports Are Received of Recent Important Advances in the Industry.

Market Remains Undecided.....*L. W. Alwyn-Schmidt* 81
Readjustment Has Forced Low Pressure—General Conditions Healthy.

Adoption of Simplified Practice Recommendations for Hot-Water Storage Tanks.. 82

The Argument for Air Admission Above the Fuel Bed as the Solution of the Combustion Problem.....*Walter S. Timmis* 83

New Regulations for the Installation of Blower and Exhaust Systems..... 84
Systems for the Removal of Flammable Vapors.

Standard Specifications for Cast-Iron Pipes Being Compiled..... 85

Heating and Piping Contractors' National Association..... 85
New Officials of the Heating and Piping Contractors' National Association.
Important Resolution Adopted by Heating Contractors on Boiler Ratings.

American Construction Council on Building Situation..... 86

The Spring Season of 1924.....*G. J. O'Connor* 86

Correspondence..... 87
Operating Vacuum Heating Systems at Varying Radiator Temperatures.

A Plan to Co-Ordinate Building Maintenance with New Construction Work..... 87

Deaths..... 92
Horace M. Swetland.
Burton P. Hall.
S. Olin Johnson.

Standard Heating and Ventilating Data Sheets..... 94
132-YY—Vapor Heating—Hoffman Controlled Heat.
132-ZZ—Vapor Heating—Hoffman Controlled Heat.
132-I (Revised)—Vapor Heating—The Webster System.
132-J (Revised)—Vapor Heating—The Webster System.

Vol. XXI No. 8

Contents for August, 1924

How They Heat With Fuel-Oil on the Pacific Coast.....*C. W. Wright* 41
Notes on Present Practice in a Section of the Country Where Oil-Burning Has Long Been Successfully Applied.

Control of Heat Output from One-Pipe Radiators.....*S. Homer Woodbridge* 44
Details of a Method for Fixing the Ratio of the Steam-Filled Space Within the Radiator to the Air-Filled Space.

Welded Pipes in Buildings.....*H. E. Wetzell* 46

The Rise of Steam Flow Meters in Central Station Heating Service.....*Henry Allen* 48
How the Practice Has Developed of Selling Steam at the Source of Supply, Due to the Additional Demand for Free Steam for Cooking and General Industrial Use.

A Short, Practical Method of Designing Gravity Water Heating Systems
F. E. Giesecke 53
V—Design of Two-Pipe Systems with Direct or Reversed Returns.

Summer Ventilation and Cooling of Office Buildings.....*Peter H. Bryce, M. A.* 56
How a Small Refrigerating Machine Was Used to Reduce the Indoor Temperature from 80° to 70° F. and to Maintain a Relative Humidity of 70%.

New Rules for Figuring Effect of Wind on Heat Losses from Buildings.*A. C. Willard* 57

Novel Air Duct Design in Aeroplane Engine-Testing Laboratory..... 59

Back to First Principles.....*T. W. Reynolds* 60
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

Pros and Cons of Fuel-Oil Heating for the Home..... 63

Building a Concrete Box Around an Existing Steam Main..... 63

Legal Decisions..... 65
Claim for Delay in Installing Heating Plant Disallowed.
Estimate Not to Exceed Certain Sum.
Valuing Steam Heating Property for Rate Making.

The State of the Ventilating Art in 1875..... 65

Bid Blank for Use in a Cost Analysis of School Heating and Ventilating Equipment 66

New Regulations for the Installation of Blower and Exhaust Systems..... 67
Stock and Refuse-Conveying Systems.

Correspondence..... 69
Water Temperatures Required for Different Outside Temperatures.
Basing Economy of Fuel Upon Amount of Radiation Installed.

New Statistics of Central Station Heating in the United States..... 70

Bottom of Depression Reached.....*L. W. Alwyn-Schmidt* 72

A Typical American Cyclone..... 74

Master Plumbers Adopt Plan for Scholarship in Sanitary Engineering..... 75

Summary of Effects Produced with Different Atmospheric Conditions..... 76
Purpose and Scope of New Publicity Bureau.

National Warm-Air Heating and Ventilating Association..... 76
Early Readjustment of all Fundamental Factors and a Rewakening of Industrial Activity Looked for Throughout the Country.

Standard Heating and Ventilating Data Sheets..... 82
No. 132-J1—Vapor Heating—The Webster Type R Modulation System.
No. 132-J2—Vapor Heating—Webster Type R Modulation System.
No. 132-K (revised)—Vapor Heating—The Dunham System.
No. 132-L (revised)—Vapor Heating—The Dunham System.

Engineers' Specification Index, Page 124.

Advertisers' Index, Page 131.

YEARLY SUBSCRIPTION $2.00 **SINGLE COPIES, 20 CENTS**

Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.

Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 9

Contents for September, 1924

Recent Accomplishments in the Field of Fuel Conservation.....*Samuel R. Lewis* 45
A Review of the Important Developments of the Past Year in the Design of Heating and Ventilating Appliances Which Save Fuel.

Insulation and Heating Possibilities in Buildings.....*James Govan* 47
With Figures on the Heat Losses and Sizes and Costs of Heating Plants for a Dwelling of Eighteen Types of Construction.

Economy Methods Which Have Made Central Station Heating Practicable
H. A. Woodworth 51
How Regulation of Steam Requirements Has Been Secured by Closing Off at Night and by Adopting Automatic Pressure and Temperature Control During the Day.

Conservation and Oil Burning.....*William T. Dean* 54

Operating Figures on a House-Heating Oil-Burning Installation....*J. C. Hornung* 56
Results of a Test Conducted by a Chicago Heating Engineer in an Installation in His Own Home, With Comments on the Merits and Shortcomings of Oil-Burning.

Why Buckwheat Bucks.....*H. W. Pfeffer* 59
Some First-Hand Experiences with This Fuel in Small House-Heating Plants Which Indicate the Difficulties to Be Overcome in Making Its Use Universal.

"Arrival" of Blower Equipment for Burning Buckwheat in Heating Boilers..... 60
Burning Low-Priced Coals in Heating Boilers.
Sirocco Fans and Culm Burn Grates for Small Forced-Draft Equipment.
The Lokol Burner.

Manual of Smoke and Boiler Ordinances and Requirements..... 62

National Trade Extension Bureau..... 63
Automatic Heat Regulation Campaign.
Manager William J. Woolley to Remain with the National Trade Extension Bureau.
Using a Mailing List Profitably.
Business Helps for Heating and Plumbing Contractors.

Smoke Abatement as Applied to House-Heating Boilers..... 65

Standards Proposed by Smoke Prevention Association..... 66

Correspondence..... 68
Unsteady Water Line Causes Cracked Boiler Sections.
Extending the Vacuum to the Inside of the Radiator.

Tappings for Hot Water Storage Tanks..... 70

Effect of Over and Under Radiation Upon the Steam Consumption in a Building... 71

The Value of Insulating Hot Water Circulating Lines..... 72

New Data on Steam Savings with Temperature Control..... 73

Important Government Decision on Separation of Contracts..... 74

The Customer and His Coal Pile.....*Thomas D. Casserly* 75

Steam Service Control Through Intermittent Supply..... 76

Expansion of the New York Steam Corporation..... 78

New Publications..... 83
Coal Truths on Damper Regulation and Furnace Equipment.
Electric Heating of Residences.

More Signs of Improvement.....*L. W. Alwyn Schmidt* 85
Farmers Buy More Freely—Optimism Returns.

Heating and Piping Contractors' National Association..... 86
New Standard Radiation Estimating Table.

Standard Heating and Ventilating Data Sheets..... 88
No. 48—Fuel-Oil—General Data.
No. 48-A—Fuel-Oil—Comparative Cost of Fuel-Oil at Different Rates.
No. 48-B—Fuel-Oil—Contents of Horizontal Cylindrical Tanks, Partially Filled.
No. 48-C—Fuel-Oil—Combustion Rates for Different Boiler Capacities.

Engineers' Specification Index, Page 130.

Advertisers' Index, Page 138.

YEARLY SUBSCRIPTION $2.00 **SINGLE COPIES, 20 CENTS**

Published monthly at 10 Beaver Street, Albany, N. Y., by the Heating and Ventilating Magazine Co.

Executive and Editorial Offices 1123 Broadway, N. Y.

Entered as second-class matter at the Post-Office at Albany, New York, December 1, 1923, under the Act of March 3, 1879.

Copyright, 1924, by Heating and Ventilating Magazine Co.

The Heating and Ventilating Magazine

Vol. XXI No. 10

Contents for October, 1924

Comparative Costs and Heat Emission for Cast-Iron Direct Radiation *T. W. Reynolds* 41
With Detailed Data for Eight Different Radiator Heights and Wall and Window Radiators.

Progress in the Rating of Heating Boilers 46
A Comparison of Three Methods, Including That Just Announced by the Chicago Master Steamfitters' Association.

The Movement Towards a Standard Radiation Formula 49
Principal Features of the Rules Compiled by the Heating and Piping Contractors' National Association.

A Short, Practical Method of Designing Gravity Water Heating Systems *F. E. Giesecke* 52
VI—The Design of a Two-Pipe System with Overhead Distribution and Reversed Return.

Back to First Principles *T. W. Reynolds* 58
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

Who's Who in Heating and Ventilation 61
IV—E. Vernon Hill.

President Frank A. Merrill on the Heating Boiler Rating Movement 63

Home-Study Course in Gravity Steam and Water Heating 63
Announcement.

An Early Scheme for Heating and Ventilating the U. S. Capitol 64

Standard Screw Threads Adopted 65

Standardization of Pipe Flanges and Fittings 65

Legal Decisions 66
Water Heating Rates.
Increased Steam Heating Rates Upheld.
Countermanding Orders for Equipment.
When Buyer Repudiates His Contract.

Specifications for Steel and Wrought-Iron Pipe Approved by A. E. S. C. 67

Correspondence 68
Selection of Pumps for Vacuum Heating.
Why Not Extend the Vacuum to be Inside of the Radiator?

Huge School Building Programs for American Cities 70

Heating and Piping Contractors' National Association 71
Reappointment of Present Members of Standardization Committee.

Warm-Air Heating Research Residence Completed 71

What Happens when Fuel Burns I *Samuel S. Wyer* 72

New Publications 72
A. S. H. & V. E. Guide, 1924-1925.
Smoke Abatement.
Household Physics.
Solving the Nation's Heating Problem.

The Function of the Differential Loop in Vapor Heating 78

The State of Business *L. W. Alwyn-Schmidt* 79
West Shows Marked Improvement.

How Chicago Theaters Are Ventilated 80

Garage Ventilation 80

Standard Heating and Ventilating Data Sheets 82
No. 14-L —Radiator Ratings—1 Col. Steam, Recessed.
No. 14-M—Radiator Ratings—2 Col. Steam, Recessed.
No. 14-N —Radiator Ratings—3 Col. Steam, Recessed.
No. 14-O —Radiator Ratings—4 Col. Steam, Recessed.

The Heating and Ventilating Magazine

Vol. XXI No. 11

Contents for November, 1924

Another Central Heating System Turns to Live Steam.....*L. E. Young* 41
Details of 1924 Construction Program of the Union Electric Light and Power Company, St. Louis, Which is Substituting High-Pressure Steam Operation from a Central Plant for Isolated and Interconnected Plant Service.

Insulation of Roofs to Prevent Heat Loss and Condensation.....*W. L. Miller* 45
With Notes Showing How to Figure this Work and the Savings Made Possible when Effective Insulation is Applied.

Home-Study Course in Gravity Steam and Water Heating..... 50
I.—Basic Heating and Ventilating Data.

Further Data on Quartz Windows..... 58

Back to First Principles.....*T. W. Reynolds* 59
Plain Answers to Direct Questions on Present-Day Heating and Ventilating Practice.

The Rise of Panel Heating..... 63

Welding a 1000-Ft. Pipe Line..... 64

British Heating Engineers Discuss Research, Radiators and Fuel-Oil..... 65

American Society of Heating and Ventilating Engineers..... 67
Officers Nominated for 1925.
Council Meeting Notes.
Opening Meeting of Western New York Chapter.
New Officers of Wisconsin Chapter.
Kansas City Chapter.
Toronto Chapter Holds Its Inaugural Meeting.
Annual Meeting of Illinois Chapter.
New York Chapter Discusses Ozone at Opening Meeting.

Features of University of Illinois' Short Course in Plumbing and Heating..... 68

The Corbels on the American Radiator Company's Building..... 69

Why Priming and Foaming Occur in Heating Systems More Often Than Formerly 69

A Device for Locating Pipes in Walls..... 69

American Construction Coucil on the Building Situation..... 69

Correspondence..... 70
Backing Up of Water in Air-Line Returns.
Operation of Thermostatic Traps on Radiators.
Whistling Noise in Gas Burners.

The State of Business.....*L. W. Alwyn-Schmidt* 73
More Signs of Improvement.

District Steam Heating in Congested New York City..... 74

Anthracite Coal Operators Announce New Device for Burning Buckwheat in House-Heating Boilers..... 75

Overcoming Fuel Waste by Admitting Air Through Fire-Doors..... 76

Test of a Gas-Fired Heating Boiler..... 77

New Books..... 78
Engineering in American Industry.
Application of Gas to House Heating.
Institute of Research of Lehigh University.

New Ideas in the House Humidifying Field..... 79

How to Heat Your Home.....*Samuel S. Wyer* 80
II.—Putting the Heat Where Needed.

New Publications..... 80
A Chapter in American Education.
British Engineers Association Directory of Members and Their Manufacturers 1924.
Electric Heating.

Standard Heating and Ventilating Data Sheets..... 84
No. 14-P—Radiator Ratings—1 Col. Steam, Rating with Shield.
No. 14-Q—Radiator Ratings—2 Col. Steam, Rating with Shield.
No. 14-R—Radiator Ratings—3 Col. Steam, Rating with Shield.
No. 14-S—Radiator Ratings—4 Col. Steam, Rating with Shield.

Contents for December, 1924

We Need More Brains in Heating System Design.....*J. H. Walker* 41
Economy of Operation is Insufficiently Considered in the Vast Majority of Cases, According to a Recent Extensive Study in Detroit.

Practical Notes on House-Heating by Gas..... 43
Data Compiled by the American Gas Association Which Give the Necessary Information for Figuring This Class of Work.

Home-Study Course in Gravity Steam and Water Heating..... 48
II.—B. T. U. Basis of Figuring Heat Losses.

Back to First Principles.....*T. W. Reynolds* 54
Troubles from Bull-Head Tees and Connections.
Cure for Smoky Fireplace.

American Society of Heating and Ventilating Engineers..... 57
Illinois Chapter's Views on Proposed A. S. H. & V. E. Heating and Ventilating Code.
Fuel-Oil Has Its Inning with the New York Chapter.
Philadelphia Chapter Discusses the Designing and Heating of Homes.
Kansas City Chapter Swells the A. S. H. & V. E. Research Fund.

Time Required for Estimating Heating Work.....*William Bergner* 59

The Weather for October, 1924..... 60
New York, Boston, Pittsburgh, Chicago and St. Louis.

Legal Decisions 62
Insufficiently Performed Heating Contracts.
Owner Waived Right to Architect's Certificate.
Rates for Central Station Heating Service.
Right of Sub-contractor Installing Heating Plant to Action on General Contractor's Bond.

Correspondence 63
The Change from Coal to Oil in the Home-Heating Plant.
Dust in Air Ducts.
Flashing of Condensation in Return Pipes.

Rules for Finding Contents of Partly-Filled Tanks.....*J. C. Hornung* 64

Convention of American Gas Association..... 65

Seasonal Employment in the Steamfitting Trade..... 65

Mechanical Progress Illustrated..... 66-67
Equipment of the Mechanical Engineering Laboratories of the University of Illinois for Testing and Demonstrating Heating and Ventilating Apparatus.

How "Certified Heating" Benefits Both the Public and the Contractors..... 68

British Heating Research at a Critical Point..... 69

Heating Equipment of Modern Apartment Hotels.....*J. F. Musselman* 70

Ventilation as a Business Getter..... 71

Electric Heating of the Residence..... 71

National Trade Extension Bureau..... 72
Annual Conference of Sales and Advertising Managers.
The Apprentice Situation.
Inauguration of T. E. B. Apprenticeship Service Department.
New T. E. B. Membership Seal.

The Business of Heating.....*Henry B. Gombers* 73

Western Society of Engineers Investigates Free Engineering..... 73

The State of Business.....*L. W. Alwyn-Schmidt* 74
Outlook Uniformly Good.

Efficiency Test of a Small-Size Kewanee Firebox Boiler..... 77

Test of Roof Ventilator Installation in Converter Sub-Station of New York Central Railroad 78

How to Heat Your Home.....*Samuel S. Wyer* 82
III. How to Use Anthracite.
